Solitary Solutions

Quick, Affordable, Certified

Solitary Solutions, Inc. specializes in Website Design, Website Hosting, and Software Development. Our Website and Software development teams are certified and ready to serve your business needs.

Our company's success has primarily come from a few out of the box principals that include:

No Contracts

We do not require our customers to sign any type of contract.

No Payment Until You're Satisfied

We only require payment once the work has been completed and you're satisfied. Very simply, if we are unable to produce a product to your liking there are no charges. We simply keep our work and allow you to take your business elsewhere. Our company has confidence in the work we perform.

Flexible Payments

We offer flexible payment options. If you're a small business or on a tight budget we allow you to make monthly payments with 0% interest if needed.

Our goal is to earn your trust and establish a long lasting business relationship.

Software and Application Development

Solitary Solutions Custom Programming Team offers programming services at prices that some of our clients can't believe. We leverage the speed and ease of ColdFusion programming into client savings!

Overview

ColdFusion is a very powerful web application server made by Adobe. ColdFusion was the first web application server available for sale, back in 1995 - before PHP and ASP. ColdFusion runs on Windows and Linux servers, has built in functionality to support .Net, J2EE, Microsoft Exchange, AJAX and a host of Adobe applications like Flash. ColdFusion allows for very rapid development, which means faster timelines and smaller budgets for our clients.

Extensibility

With ColdFusion, you have built in access to a powerful site search engine, document creation (Word, Excel, PDF, etc.), server based image manipulation, Microsoft Exchange integration and hooks for J2EE and .Net. Solitary Solutions uses these built in tools to save clients hundreds of hours and thousands of dollars of development time.

Testimonials

Working with Solitary Solutions on my web site design was a pleasure. I really appreciate their professionalism during the process and their ability to help me get my message presented in such a tasteful manner. I am confident that my site will be well received by my customers and am proud to steer them to it.

Roger Boxwell, Turbine Engine management

Our Help With HR Software Product

Personnel Manager:

This is our core component that serves as an organization-wide human resources database that stores, tracks and analyzes your personnel data.

Benefits Tracker:

This component provides your company with the ability to administer and track employee participation in benefit programs.

Attendance Manager:

Organizations can effectively track and manage employee absenteeism with Attendance Manager.

Time Manager:

This component allows employees from their workstation to log in/out for the work day including lunches and breaks.

Workforce Scheduler:

Our Workforce Scheduler has been generally used by companies with service technicians.

Company Trainer:

This is a component for organizations to administer and track employee training.

Recruiter Manager:

This component provides your organization the ability to track all applicants. As an HR administrator you will have the ability to build a profile for each applicant including items such as their name, resume, application, position applying for, race, and gender.

Website Design

At Solitary Solutions, we know that web design involves a lot of work. When we design a website for you, we:

- 1 Work out navigational issues.** We want to make sure that your customers and clients can easily find what they are looking for. We determine what customers and clients are looking for on your website. Our goal is then to make sure they can find what they need easily. This helps ensure that clients are perfectly happy with your website.
- 2 Work out usability issues.** We want your website to be easily accessible to everyone, which is why we make sure that it even works for someone viewing your site on a slow Internet connection.
- 3 Consider your existing brand, logo, collateral, and primary audience.** We take into account your budget, who your customers are, and what your business is all about. That's because we don't want to create a cookie-cutter website. We think that your company deserves a personalized website that works for you and not for just anyone in your field.
